

Dear Judi,

We were very impressed with the places that we visited. You and the members of the committee chose very interesting locations for us to recognize.

We learned about the organization that take care of the elderly, and the wonderful activities for the handicapped. Specially was interesting to see elderly people living side by side with handicapped people and helping each other.

We were overwhelm with your new hospital, and even though it was hard to experience, we learn about respectful treatment in our visit to the hospice.

We were glad to hear about your projects and tell you about ours, like "wishes come true" from the women circle.

The members of the exchange, Yaron and I can't stop talking about our experience in Delft, the places we have being, the people we had met, and the things we have learned.

We are happy to tell you that we heard from the members of the delegation that they are keeping in touch with the hostess families.

Thank you for sending us the newspaper article.

Warm regards for you and all the members of our committee,
Yaron and Silvia
